

Activities · AI Vibe Coding for iOS Mobile Apps Development

Course code: TGS-2023037545

The ten Activities form one progressive BudgetBuddy build:

1. Activity 1: Requirements and Component Boundary — K1, A1 — `01-requirements-component-boundary/`
2. Activity 2: Portable C++ Domain Core — K1, A1 — `02-portable-cpp-domain-core/`
3. Activity 3: AI-Assisted TDD for C++ — K2, A2 — `03-ai-assisted-tdd/`
4. Activity 4: Toolchain and Quality Gates — K2, A2 — `04-toolchain-quality-gates/`
5. Activity 5: Objective-C++ Adapter — K3, A3 — `05-objective-cpp-adapter/`
6. Activity 6: SwiftUI Controls and State — K3, A3 — `06-swiftui-controls-state/`
7. Activity 7: Persistence and Error Recovery — K4, A4 — `07-persistence-error-recovery/`
8. Activity 8: Interoperability Validation Scorecard — K4, A4 — `08-interop-validation-scorecard/`
9. Activity 9: Architecture and Traceability Documentation — K5, A5 — `09-architecture-traceability-docs/`
10. Activity 10: Capstone: BudgetBuddy Release Evidence — A1, A2, A3, A4, A5 — `10-capstone-release-evidence/`

Start with IOS-VIBE-CODING-PROMPT-PACK.md for the complete prompt-driven workflow. Detailed procedures, tailored generation prompts, review/repair prompts and verification criteria are in each Activity README and its same-basename PDF counterpart.
